ShellNewHandler Crack + X64

* Start new files in explorer.exe with certain extensions (for example *.txt and *.db). * It is a freeware that runs in just one click without installation. * No bugs in your registry. * Toss files and folders directly from Explorer. * Import, export and batch export settings. * Export settings to a file for later use. * Display icons in Explorer for files with certain extensions (for example *.db). * Save and enable file extensions settings using file extension keys. * Search for file extensions settings in the registry. * Select or deselect shell extensions (for example *.db). * Support, including technical support, is available via our web site and forum. ShellNewHandler is a freeware for Windows that doesn't contain any adware or Spyware. The installer is completely free of charge and does not contain bundled items that are usually included for free in freeware packages. At present, the application is in English, but we expect that all language files will be made available shortly. * Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows 10. • ShellNewHandler • ShellNewHandler ShellNewHandler is a tiny and portable piece of software that puts simple options at your disposal for showing and hiding shell entries in the Windows Explorer right-click menu when attempting to create new files. It's geared toward first-time and experienced PC users alike. No installation necessary Since this is a portable package, you don't need to set up anything. This means that you can save ShellNewHandler anywhere on the disk or on a USB storage unit (like a pen drive) to be able to directly run it on any PC without any previous installers. However, you should keep in mind that it affects the Windows registry when enabling or disabling keys for the file format in question. Simple and straightforward interface As far as the GUI is concerned, the application adopts a standard window with a clear-cut structure that shows all options available. It automatically loads all current file extensions that are shown in the "New file" menu, along with details about their description, standard file type and registry key. Seamlessly enable or disable file types By default, all file formats are selected, which means that all of them are visible, so you can deselect any one of them to make it invisible. All changes are applicable with the click of a button. The

What's New In?
